LITRES

On behalf of

i-team Global has realised the number of litres of drinking water shown on the left via MADE BLUE.

To this end, the MADE BLUE Foundation invests in water projects in countries with severe water scarcity. This will make at least as many liters of clean drinking water available for people who currently do not have access to safe water.

i-team Global mirrors all the water used by all its cleaning machines, such as the i-mop, that are active.

This sub-certificate covers the deployment of machines at the aforementioned customer's location.
